# Introduction

This is a template made for PhD dissertations at The Hong Kong Polytechnic University, and follows the university's requirements stipulated in the Research Postgraduate Student Handbook (<https://www.polyu.edu.hk/gs/rpghandbook/ref-regulations-format-thesis>). The original of this  $\text{\LaTeX}$  template was created by Tom M. Ragonneau, at the Department of Applied Mathematics (you can access it here <https://github.com/ragonneau/phd-thesis-template>), and subsequently modified by Gábor Parti, Department of Chinese and Bilingual Studies. This version is tailored for linguistics-oriented theses, and supports multi-scripted documents. It is optimized for Lua $\text{\LaTeX}$ .

A thesis submitted for examination purpose should include the words 'Initial Submission for Examination Purpose' lettered on the front cover.

## 1.1 Typesetting

### 1.1.1 Typesetting

#### Typesetting

A nearly full list of features and tools are tested here, from typesetting to citations. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.

## Bidirectional Scripts

Arabic and Hebrew in English paragraphs, in mixed environments:

ما هو differentiation?

What is ما هو in Arabic? Most Arabic speakers consider the two varieties to be two registers of one language, although the two registers can be referred to in Arabic as *فصحى العصر* *fuṣḥā l-‘aṣr* Modern Standard Arabic (MSA) and *فصحى التراث* *fuṣḥā t-turāth* Classical Arabic (CA). ‘Arabī.

The first line of the Bible is בְּרֵאשִׁית בָּרָא אֱלֹהִים אֶת הַשָּׁמַיִם וְאֶת הָאָרֶץ (Genesis 1:1).

### 1.3 Acronyms, Glossary Terms, and Indexing

The  $\TeX$  typesetting markup language is specially suitable for documents that are annoying to make.

Glossaries and acronyms both have to be set in the `glossary.tex` with similar methods, and then called in the text. When an acronym appears for the first time, its full form is also shown. Such as, *Oxford English Dictionary* (OED) but the second time OED. For plural and capital glossaries use **taxon** and **taxa**; **Taxon** and **Taxa**.

Index one is here and two is here. There is also index for tables, figures, and footnotes. Also, there is grouped indexing possible for things like black pepper, white pepper, and green pepper.

### 1.4 Citations

Citation examples, such as (Laufer, 1919, p. 99), which now is the same as (Laufer, 1919, p. 99) and Laufer (1919), but `footcite` also exists.<sup>2</sup> Multi-volume citing is also available, (Bearman et al., 1960–2005, vol. 9, p. 99) & Bearman et al. (1960–2005, vol. 9, p. 99).

### 1.5 Lists and Environments

1. one
  2. two
  3. three
- one
  - two
  - three

**Note 1.5.1.** This is a note.

<sup>2</sup>Laufer, 1919.

$$x^2 = 1 \tag{1.1}$$

This (above) is an equation. In Equation 1.1 we have  $\sqrt{\log n}$ .

- (1) *Ez egy nyelvészeti példamondat.* Hungarian (Finno-Ugric, *reference*)  
 This a linguistic example-sentence  
 “This is a linguistic example sentence.”

**Etymology 1.** English *pepper* < Middle English *peper* < Old English *pipor* < West Germanic *\*piper* < Latin *piper* ‘black pepper, long pepper’ < Ancient Greek *péperi* ‘pepper’ < Pahlavi < Middle Indo-Aryan *pippari* ‘long pepper’ < Sanskrit *pippalī* ‘berry, peppercorn’, *pippalī* ‘long pepper’<sup>a</sup>

<sup>a</sup>This is a custom, iterating environment that you can modify for whatever purpose.

This line has a reference for Etymology 1 and a ‘clever reference’ for Section 1.5. And below is a quote.

*“By convention sweet and by convention bitter, by convention hot, by convention cold, by convention color; but in reality atoms and void.”*

—Democritus, 3<sup>rd</sup> century BC  
 (DK 68B9, trans. Taylor 1999a)
